

NEW FEATURES

What's new compared to TRAKTOR 3

REDESIGNED USER INTERFACE

The overhauled user interface is designed to make TRAKTOR PRO simple to read and use, even in extreme real-world club environments. The new interface features:

- High contrast for low lighting scenarios
- Scalable fonts, visible at a distance
- Intuitive grouping of features
- Condensed workflow via a simplified structure
- GUI fully adapts to screen size
- Extra large display of selected tracks

STUNNING EFFECTS SECTION

TRAKTOR PRO comes with a brand-new, super-hot effects suite, featuring 20 new effects built using Native Instruments' ground-breaking REAKTOR technology. These are exclusive to TRAKTOR, and range from traditional delays and reverbs, to wild and unique tempo synced effects. The suite includes:

- Flexible FX routing of two independent FX slots
- Chaining of up to three effects per slot
- Maximum of 6 FX on one deck + filter
- Choose between one-knob Easy Control or "pro" mode
- Storable FX parameter defaults
- Automatic syncing of tempo based FX
- Additional individual high quality filters on each mixer channel combinable with external DJ mixer

SYNC RELOADED

TRAKTOR PRO delivers a new level in sync functionality, providing DJs with more accurate, more reliable and more convenient features, such as:

- Auto beat grid – super accurate beat grids are generated automatically when the track is first imported into your collection
- Sync Lock - once tracks are synced in the mix- they stay that way. Sync lock ensures no beat drift between tracks
- Automatic master tempo detection – play with 4 decks and numerous FX with everything perfectly synced

automatically

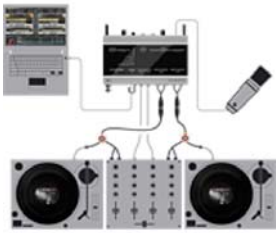

COVER ARTWORK AND CRATE FLICK

The Browser has also been enhanced in TRAKTOR PRO. It's now easier than ever to manage your collection and instantly find the right track for your set. TRAKTOR PRO's browser now features:

- Crate Flick - visually flick through your collection using cover artwork seeing up to 20 artworks at the same time at high speed
- Big cover art display + display of cover art of the loaded track in the deck
- Import artwork for file types that usually do not support cover artwork, such as WAV and AIFF

INDUSTRY STANDARD WORKFLOWS

TRAKTOR PRO has been designed with the needs of professional DJs firmly in mind. In this respect, a number of workflows have been integrated into the software that will be familiar to users of industry standard DJ equipment.

- Play, cue, jog wheel control, hot cues loop setting and adjusting behave in the same way as leading CD decks
- FX inserts in the mixer
- Portable track meta-data and performance settings for playing on different computers
- Improved file management, incremental search, supporting all file types

FEATURE DETAILS 2

Cover art browser, workflow, DJ setup

DIGGING IN THE CRATES

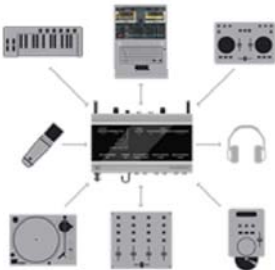

Crate Flick lets you browse your track collection using cover art, showing you the top portion of each track's cover as you flip through, just like digging in a record box. TRAKTOR PRO helps you quickly find tracks visually and even works with file formats that would normally not support artwork (AIFF, WAV). All metadata for your track collection is now fully portable, making it simple to switch between different computers. Controller settings and layout information is also transferable in one easy to upload file, ensuring TRAKTOR PRO delivers a new level of usability and efficiency.

KEEP YOUR FLOW

TRAKTOR PRO utilizes tried and tested processes that will be familiar to any pro DJ. Industry-standard workflows have been fully integrated into TRAKTOR PRO, whether using hotkeys, a mouse or a MIDI controller. Play, cue, hot cues, loop setting / adjusting, and jog wheel control behave in the same way as leading CD units, while portable track info and performance settings let you customize how TRAKTOR PRO works for you.

FLEXIBLE SETUP

TRAKTOR PRO is completely flexible. You can use your mouse and keyboard or a MIDI controller—all major controller brands now feature pre-mapped yet fully customizable MIDI assignments for TRAKTOR PRO. You can also upgrade to TRAKTOR SCRATCH PRO, and utilize turntables or CD decks to control your setup. An expansion pack for TRAKTOR PRO users includes the DVS plug-in, AUDIO 8 DJ interface, Multicore cables and vinyl and CD control discs.
