

NEW AUDIO INTERFACE

TRAKTOR SCRATCH PRO 2 now comes with the brand-new, fully professional TRAKTOR AUDIO 10 interface.

- Auto Detection for NI audio interfaces and controllers; ships with mappings for all relevant controllers
- Two additional inputs and outputs on the front side for FX send/returns or as dedicated Sample Deck channels
- Direct Thru mode allows analog signals to pass without a computer connected, making DJ switchovers a breeze
- New status LED design for clearer signal chain monitoring

OPTIMIZED USER INTERFACE + TRUWAVE

With an easy on the eye interface and the new TruWave hi-res colored waveforms, TRAKTOR software is now easier to use than ever.

- TruWave waveforms offer a whole new dimension to your mix - superior wave drawing technology results in amazing detail
- Selectable color schemes to differentiate between kicks, hi-hats and snares and anticipate your mix
- Thanks to various zoom levels, set up tighter cue points than ever before
- The overview of the whole track ("stripe") clearly displays the track's arrangement with full detail

SAMPLE DECKS

With the innovative Sample Decks with four slots each, you can enter the world of live remixing and editing in ways unimaginable before.

- Grab and layer your own loops or use the included loop content. Create one-shot samples or use the included DJ Craze scratch sounds
- Grab loops live out of a running deck, store your favorites in the loop library, and develop your own arsenal of beats and sounds
- Layer up loops in perfect sync with the decks
- Tweak the volume and filter for each Sample Deck slot separately
- 2 different sizes for the Sample Decks; each of the 4 decks can be switched from track deck to Sample Deck and vice versa, on the fly

INCLUDED LOOP CONTENT

TRAKTOR 2 software includes amazing loops and sounds from in-demand sound providers for use with the new Sample Decks.

- 40 original loops and 10 full tracks drawn from Loopmasters' new DJ Mixtools series, plus additional scratch sounds by DMC Champ DJ Craze
- Drum, bass, percussion and synth loops in dubstep, minimal, house, techno and trance styles
- Grab loops from any playing track in seconds, and save them in the loop library

LOOP RECORDER

With the new Loop Recorder you can record live loops from any channel (single or multiple), the live input feeds, or the master output.

- Trigger the recording using a foot pedal, a DJ controller such as TRAKTOR KONTROL X1 or a keyboard hot key
- Overdub on top of the running loop in real time, creating additional layers and heightening dramatic FX buildups and peaks
- Works like a 5th deck. You can transfer the layered loop into a Sample Deck slot instantly, freeing up the Loop Recorder for further use

OTHER NEW FEATURES

Many new features and enhancements make this TRAKTOR the most advanced yet easy-to-use version yet.

- Auto Detection for Native Instruments audio interfaces and controllers; ships with mappings for all relevant controllers
- New layouts, including Essential View for maximum ease-of-use when using TRAKTOR with external mixer and controller(s)
- PRO versions only: 30+ effects, now with the much requested Tape Delay, plus Ramp Delay, Bouncer and Auto Bouncer
