

Super-compact DJ audio interface with two stereo outputs for the ultimate in portable DJ setups.

ULTRA COMPACT POWER

TRAKTOR AUDIO 2 is the smallest USB DJ soundcard in the world, yet packs enough punch to rock the world's biggest clubs. TRAKTOR AUDIO 2 provides the same technology as the acclaimed AUDIO 2 DJ, with an updated look for 2011.

Two high-gain stereo outputs and an ultra-compact format provide all you need for spinning tracks from your computer, so prepare your sets and mixes on the plane or the train, and enjoy maximum flexibility when playing out.

POCKET ROCKET

You can either output both channels individually via 1/4" jacks to your DJ mixer using the supplied adapter cable, or mix internally in TRAKTOR, using one output to monitor your headphone mix and use the other as your master out. With the pocket-sized TRAKTOR AUDIO 2, you're ready to rock the clubs and after parties instantly - it doesn't get more portable than this.

SOUNDS SUPREME

TRAKTOR AUDIO 2 is built on the established and award-winning design of NI audio and hardware gear. High-end Cirrus Logic® AD/DA converters plus state-of-the-art chip technology and driver architecture ensure top sound quality and low latency for professional use on stage and in the studio.

INCLUDED SOFTWARE

TRAKTOR LE 2 DJ software provides two playback deck to spin tracks directly from your hard drive with full iTunes® integration and iPod® compatibility.

The new TruWave colored waveforms and amazing beat-sync functions make it simple to use the advanced looping, cueing and effects – go beyond ordinary mixing

TOP HARDWARE FEATURES

- Smallest USB DJ audio interface in the world, fits easily in your pocket
- The perfect travel companion for any DJ
- Cirrus Logic® 24bit / 96 kHz AD/DA converters for pristine audio quality
- New low latency Mac® and PC drivers for tightest possible response
- Two high-gain stereo outputs for punchy output levels
- One output can be used for headphone monitoring (pre-listening next track)
- Two output LEDs for instant visual feedback of signal chain
- Includes TRAKTOR LE 2 software so you can start mixing right away

SETUP EXAMPLE 1 – DJING WITH THE SOFTWARE MIXER

Using TRAKTOR AUDIO 2 without external mixer. One stereo output sends Master to PA or active monitors. Second stereo output is used for headphone monitoring.

SETUP EXAMPLE 2 – DJING WITH AN EXTERNAL MIXER

Using TRAKTOR AUDIO 2 with external mixer. Stereo outputs are routed to separate channels on mixer. The mixer will now work in exactly the same way as if two turntables or CDJs were connected.
