

Virtual Guitarist

Everyone's favorite rhythm guitarist

It's always the same problem:

Try calling a professional guitarist in the middle of the night when you need a slick 12 string accompaniment for a ballad or a hard metal groove for an advert soundtrack. Introducing Virtual Guitarist – a perfect rhythm guitarist who plays both acoustic and electric guitar, including all keys and difficult chords, who never gets impatient, sounds better, always plays 100 % tight, is always completely in tune and who doesn't need to set up his equipment or be miked up, and integrates perfectly into your VST system.

Virtual Guitarist isn't a MIDI drone, it's based on guitar tracks recorded by professional guitarists. That's why you can't tell a Virtual Guitarist track from a real guitar part played live. And you can edit all guitar tracks whenever you like, such as changing the guitar sound, changing the key, rearranging phrasing – it's all possible.

Virtual Guitarist gives you dozens of guitarists specialized in acoustic or electric guitar. Each one can play their part perfectly, regardless of whether its finger-picking on a class 12-string, strumming folk on a steel string guitar, funky off-beats, dynamic wah parts, crystal-clear LA licks on classic electric guitars and hard metal riffs.

Just choose acoustic or electric. Select a player and you're ready – even if you've never played guitar before. You can press single keys, whole chords or use a MIDI track.

Virtual Guitarist "Electric Edition"

Electric rhythm guitar and guitar FX board for VST

He's a professional guitarist. He owns a wealth of classic guitars and amps. He masters any conceivable electric rhythm guitar style from past to present. He brings his own stylish multi effect board. And he'll never age.

A success story continues. Virtual Guitarist "Electric Edition" is the perfect rhythm guitarist for anyone needing electric guitar tracks. This VST instrument is based on real recordings, yet is as flexible as a synthesizer. Featuring 29 different players from the 50s to the present day, Virtual Guitarist "Electric Edition" oozes authentic sound character whilst

offering unrivalled playability and outstanding tempo flexibility. Also included is a fully featured multi-effect board with Wah pedal, Filter, Delay, Reverb, Phaser, Chorus and Flanger; these quality guitar effects can be used both within Virtual Guitarist "Electric Edition" and in a VST host application on normal audio tracks. Playing Virtual Guitarist "Electric Edition" is as easy as using lead sheets. Select a player, select some chords and it plays perfect tracks. Liven it up with real-time controls like syncopation, phrasing variations or long chords. Change shuffle or dynamics, use track doubling or be creative with the many effects provided.

Feature Highlights (VG)
