

Discrete Audio Products for Audio Production and Live Recording

The CR2

The CR2 is a FULL featured CONTROL ROOM MONITOR module that has Four External Stereo Inputs and the internal Stereo Mix Bus. The CR2 has a signal path designed for superb sonic quality.

The features include AFL stereo level, which is switched on when ever a channel is soloed and a panel switch that switches to PFL, both functions blink the SOLO selector switch to indicate that a module is soloed. THREE control room speaker outputs, a MONO compatibility switch, Left and Right Speaker CUT switches, ONE main and TWO small client speakers and a DIM control that dims the Control room level 15dB.

The CONTROL ROOM LEVEL pot is a matched pair rotary switch with 24 detented control for perfect imaging. Of course, it uses a HUGE ToneLux knob!

The MONITOR to CUE feature sends the control room feed to either sends 1/2 or 3/4 which allows for a fast headphone monitor feed from what ever is being monitored in the Control Room. There is also a SMALL speaker level control that is after the Large Control Room Level.

The Control Room metering is accessible from the rear of the VRACK for an external set of VU meters.
