

Discrete Audio Products for Audio Production and Live Recording

The VU4

The **VU4** is a FOUR CHANNEL VU Meter panel that fits into four V-Rack slots.

The INPUT D-sub feeds the main input and the INSERT D-sub feeds the alternate input, selected by the front panel "IN" button. Additionally, the INPUT d-sub is internally MULTED to the OUTPUT D-sub, eliminating the need for Y cables and external mults.

The REF level is also selectable by the front panel "REF" switch. It selects between the 2 sets of front panel VU calibration pots.

The VU meters are illuminated with white LEDS, eliminating the need for bulb replacement.
